TRAINING GUIDE

Designing the Sign Up Screen

Smart Vendor & Procurement System
redSling UI Builder

Customize the generated Sign-Up page into a centered registration screen with a project logo, a clear heading, consistent input fields, and a full-width Sign-Up button.

1 Open and review the page

Open the existing Sign-Up page and select **Edit**. Select **Preview** to review the generated layout, form fields, spacing, and overall structure before making changes.

2 Create a centered layout

Select the outer row containing the registration form. In **Manage Styles**, remove unnecessary spacing and padding, set the background to **#FFFFFF**, and center the content.

3 Adjust the form width

Set the form container width to approximately **60%**. Remove unnecessary gaps between layout sections.

4 Arrange the page content

Move the introductory content above the registration form. Arrange the elements in this order:

1. Project logo
2. Sign-Up title
3. Description
4. Registration form

5 Add the project logo

Use the **Image** component to place the project logo above the title. Adjust its size and spacing to balance it within the centered layout.

Title and Form Fields

6 Style the page title

Set the title to **Create Your Account** or **Sign Up**, then apply these settings.

Property	Setting
Font family	Poppins
Font size	28px
Font weight	700
Line height	36px
Text alignment	Center
Text color	#1F2937

7 Update the description

Update the description beneath the title to provide context before registration. Apply Poppins at **14px**, a **22px** line height, color **#6B7280**, and centered alignment.

8 Style the registration fields

Apply the following settings to the **Email**, **Password**, and **Full Name** fields.

Property	Setting
Width	100%
Font family and size	Poppins, 14px
Background	Transparent
Border	None
Bottom border	1px solid #D1D5DB
Padding	10px 0

For the **Full Name** field, open **Manage Traits** and set the placeholder to **Enter your full name**.

Form Container and Final Review

9 Style the form container

Select the outer form container and apply the following settings.

Property	Setting
Background	#FFFFFF
Border	1px solid #E5E7EB
Border radius	8px
Padding	32px

10 Style the Sign Up button

Select the Sign-Up button and apply the following settings.

Property	Setting
Background	#0B3B5C
Text color	#FFFFFF
Font family	Poppins
Font weight	600
Border radius	8px
Width	100%

11 Save and preview

Save the page and open **Preview**. Check the following before completing the screen:

1. Logo placement and size
2. Title alignment
3. Description spacing
4. Form width and alignment
5. Consistent styling across all input fields
6. Form container border, radius, and padding
7. Sign-Up button appearance

Completed screen

The finished page has a centered layout, project branding, a styled title and description, consistent registration fields, a card-style form container, and a clearly visible Sign-Up action.
